Professional Profile

4th-year Information Systems Engineering student (UTN FRD) looking for a first professional opportunity. I enjoy being efficient and optimizing my activities and time, which sparked my interest in Engineering. I want to build skills and put my academic knowledge into practice in the systems field. Beyond the technical side, I care about understanding the business and the client's perspective: listening closely to truly grasp the problem to solve.

Education

Information Systems Engineering (4th year) 2023 – 2028
Universidad Tecnológica Nacional – Facultad Regional Delta (UTN FRD), Campana

Bilingual High School Diploma, Cambridge IGCSE 2015 – 2021
Colegio Dante Alighieri, Campana, Buenos Aires

Projects

AyudAPI – Emergency Medical Assistance Platform 2026
Team project, UTN FRD

- **Design and development:** client-server platform to assist in medical emergencies in public places, featuring unique patient QR generation, web scraping to validate professionals, and metrics for health insurers.
- **Quality and operations:** management of software quality and security standards; PostgreSQL + MinIO, monitoring with Prometheus + Grafana, and OpenCode as an AI code agent.

Ruteando – Logistics and Route Optimization App 2025
Team project, UTN FRD

- **Design and development:** app to manage and monitor parcel delivery routes, deployed with Angular/Node.js + Django and the Google Maps API.

Personal AI Assistant (n8n-Agent) In progress
Personal project

- **Automation:** self-hosted assistant built with n8n on Docker; a Telegram bot triggers an AI agent that orchestrates Google Calendar tools and delegates GitHub tasks to per-repository workflows.

Other projects

- **miCartuchera:** personal portal of useful websites, pure frontend deployed on Vercel (demo).
- **Lexical-syntactic analyzer (2024, UTN):** Python interpreter built on a lexer and a parser.
- **Wollok Game (O.O.P., 2024, UTN):** 2D simulation inspired by Super Mario Bros with interactive features, in the object-oriented language Wollok.

Work Experience

Car Wash Venture 2024 – 2026
Weekend service (close circle of clients)

Skills and Additional Information

- **Languages and frameworks:** Python, C, JavaScript, TypeScript, CSS, Angular, Node.js, Django.
- **Data and tools:** PostgreSQL, SQLite, MySQL, Excel, Postman, draw.io, GitHub.
- **DevOps and observability:** Docker, Prometheus, Grafana, MinIO.
- **AI and automation:** n8n, Claude Code, OpenCode, Gemini, v0; LangGraph (learning).
- **Areas of interest:** systems analysis, design and administration; software development, testing and quality; UX/UI design; DevOps; project management; bilingual technical communication and coordination.
- **Soft skills:** analytical thinking, commitment, teamwork, leadership, perseverance and optimism, effective communication, process-optimization mindset.
- **Languages:** Spanish (Native), English (Advanced; Cambridge IGCSE and First Certificate B2), Italian (Intermediate).
